Washington DC 20515

Dear Senator Murray and Representative Davis,

On behalf of First Focus Campaign for Children, a bipartisan children's advocacy organization dedicated to making children a priority in federal budget and policy decisions, I am writing to express our support for the Stop Child Summer Hunger Act of 2019 (S. 1941/H.R. 3378.). This legislation is an important component of the comprehensive package needed to fight summer hunger for millions of our nation's children.

As you know, food insecurity is a devastating reality for 12.5 million—or 1 in 6—children across the country. For these children, many of whom are already exposed to the harmful effects of poverty, this inconsistent access to enough healthy food creates yet another obstacle to their ability to learn, grow, and thrive. Child Nutrition Programs such as the National School Lunch Program and National School Breakfast Program, and Summer Food Service Program are instrumental in ensuring that such children can count on a nourishing meal at school or at a congregate feeding site in the summer. Unfortunately 83 percent of the low-income children enrolled in School Meal programs are not accessing nutrition during the summer. For more than 17 million children, summer is the hungriest time of the year.

First Focus Campaign for Children knows it will take a multi-pronged approach to ensure that these children have enough to eat during the summer months. This includes strengthening and expanding summer meal sites so that they are accessible to more children, extending the Summer Electronic Benefit Transfer (EBT) program so that families can purchase additional food for their children during the summer, and, where appropriate, establishing non-congregate models to fill in the gaps.

The Stop Child Summer Hunger Act of 2019 takes the important step of making this comprehensive package a reality by making the Summer EBT program available to all families with children eligible for free and reduced price lunch. Summer EBT has already proven to reduce very low child food security by 33 percent. Meanwhile, a recent landmark study by the National Academy of Sciences estimates that making Summer EBT available to all eligible school-age children, in concert with overall increases to Supplemental Nutrition Assistance Program (SNAP) benefits,

could reduce child poverty by 18 percent¹. We applaud this legislation and look forward to the process of Child Nutrition Reauthorization as an opportunity to incorporate it into a comprehensive package that closes the summer hunger gap.

Thank you for your long-standing commitment to ending summer hunger and important leadership in this area. We look forward to continuing to work with you to ensure that Child Nutrition Reauthorization makes critical investments to increase the reach of summer nutrition to guarantee that kids are not hungry during the long summer vacation and return to school in the fall healthy and ready to learn.

Sincerely,

A handwritten signature in blue ink that reads "Bruce Lesley". The signature is written in a cursive, slightly slanted style.

Bruce Lesley, President
